

Ahmad Shami

ABOUT ME

An M2 Cybersecurity student with background in various fields including software and web development, embedded systems, operating systems, mobile technologies and systems. I have more than 5 years of experience in web security, system's security and reverse engineering. I am aiming to become a security researcher in the field of kernel, hypervisor and sandbox security.

Email: ahmad.shami@etu.univ-grenoble-alpes.fr
Phone: +33 7 63 67 63 63
Website: snaggy-w.github.io
Location: Grenoble, France

SKILLS

- C/C++, C#, VB development
- Python, Bash, PS scripting
- Android Development & Reverse Engineering
- Binary Static & Dynamic Analysis
- Embedded systems modelling & VHDL
- PHP base development
- Django/Flask development
- Node.js development
- GNU/Linux + Proxmox System administration
- Active Directory/Windows system administration
- Docker and networking Administration
- Git version control

LANGUAGES

English (Fluent)
IELTS C1, 7.5
Arabic (Native)
French (A2)

M2 Internship Applicant Université Grenoble Alpes/Ensimag

EDUCATION

M2, CYBERSECURITY (CYSEC).

Ensimag Grenoble INP/IM2AG – UGA.

2026–Present

◊ The program is focused on software security, embedded systems security and cryptography

M1, INFORMATICS (MoSIG).

IM2AG – Université Grenoble Alpes (UGA).

2025–2026

◊ The program is a diverse computer science program teaching concepts from the fields of operating systems, networks, embedded systems, cryptography, mathematics and algorithms.

M1, INFORMATICS & INFORMATION SYSTEMS ADMINISTRATION.

Lebanese University, Faculty of Technology.

2024–2025

◊ Ranked 3rd.

◊ The program is focused on information systems management, business administration, software development, web development and AI.

LICENCE PROFESSIONNELLE (L3), COMPUTER NETWORKS & SECURITY.

Lpro CNMS – UGA.

2023–2024

◊ Ranked 1st, 16.6/20.

◊ Exchange program focused on cloud computing, networking and network security.

BACHELOR, COMPUTER NETWORKS, SIGNALS & IoT.

Lebanese University, Faculty of Technology.

2021–2023

◊ Ranked 3rd, 71.58/100.

◊ The program is focused on networking, signals, electronics and IoT, mathematics, software development and low level programming.

BACCALAURÉAT, GENERAL SCIENCES.

2020–2021

◊ Honours – 18/20, 28th nationwide.

◊ High school degree in mathematics and physics.

EXPERIENCE

RESEARCH INTERN.

Verimag, Grenoble.

Jan–Jul 2026

◊ Research internship to answer the question “How good are LLMs to detect and correct software vulnerabilities?” by building an AI agentic framework that is capable of exploiting C based programs.

INTERN – SYSTEM ADMINISTRATION & SOFTWARE DEVELOPMENT.

LPSC – IN2P3/CNRS.

Mar–Jul 2024

◊ Handling and taking advantage of servers and services logs using Syslog and different industry grade SIEMs (ELK/Grafana Loki/Graylog).

◊ Worked on the migration process from ESXI clusters to Proxmox clusters.

◊ Developed an access request web portal to physical experiments via a LAMP stack.

◊ Developed automation scripts using Bash & Python to handle user access, user creation and user authentication to servers conducting physical experiments.

CENTER OF INTEREST & HOBBIES

COMPETITIVE CAPTURE THE FLAG (CTF) PLAYER

2020–Present

◊ Rigorous practitioner of pentesting vulnerable labs like TryHackMe and Hack The Box.

◊ Live CTF competitions player: Actively participating in CTF competitions and CTF platforms like picoCTF and pwn.college.

BUG BOUNTY HUNTING

2023–2025

◊ Pursued vulnerability disclosure programs on HackerOne and YesWeHack. Disclosed 2 bugs in web application Oauth solutions and web to C compiler intergrations.

INTELLECTUAL ACTIVITIES

◊ Persuing activities like reading novels and books about psychology sciences, strategy sciences..., as well as learning electric guitar music

SPORTS AND ENTERTAINMENT

◊ Enjoying activities like swimming, tennis and video games (Retro emulated games, strategy defense games...)
