Address

Grenoble, France

Skills

- Python, Bash, PS scripting
- C/C++, C#, VB development
- Android Development & Reverse Engineering
- Binary Static & Dynamic Analysis
- PHP base development
- Django/Flask development
- Node.js development
- GNU/Linux + Proxmox System administration
- Active Directory/Windows system administration
- Docker and networking Administration

Languages

English (C1 - IELTS 7.5)

Arabic (Native speaker)

French - Basic level (A2)

Ahmad Shami

M2 Cysec Applicant

About Me

A cybersecurity enthusiast with a Bachelor's degree in Computer Networks, Mobility and Security (CNMS), and currently pursuing a Masters degree in informatics. I have more than 5 years of experience in web security, system's security and reverse engineering. I am aiming to become a security researcher in the field of kernel, hypervisor and sandbox security.

Education

- **Master's (M1) in Informatics** **2025 - Present**
Masters Degree in informatics at Grenoble (MoSIG) - UGA - IM2AG
- **Master's (M1) in Informatics and Information Systems Administration** **2024 - 2025**
Masters Degree in informatics of information systems (Ranked 3rd) - Lebanese University Faculty of Technology
- **Licence professionnelle (L3) in Computer Networks and Security** **2023 - 2024**
Bachelor's in Computer Networks, Mobility and Security - Lpro CNMS - UGA (Ranked 1st with an average of 16.6/20)
- **Bachelor in Computer Networks, signals and IoT** **2021 - 2023**
Bachelor's in Computer Networks And Communications Engineering - Lebanese University Faculty Of Technology (Ranked 3rd with 71.58/100 average)
- **Deplome Baccalauréat** **2020 - 2021**
High school certificate in General Sciences. Graduation with honors (18/20 average ranking 28th nation wide)

Professional Experience

- **Internship at Verimag** **Jan 2026 - Jul 2026**
 - Research internship to answer the question "How good are LLMs to detect and correct software vulnerabilities?" by building an AI agentic framework that is capable of exploiting C based programs.
- **Internship at LPSC - IN2P3/CNRS** **March 2024 - July 2024**
 - **System Administration**
 - Handling and taking advantage of servers and services logs using Syslog and different industry grade SIEMs (ELK/Grafana Loki/Graylog)
 - Worked on the migration process from ESXI clusters to Proxmox clusters
 - **Software Development**
 - Developed an access request web portal to physical experiments via a LAMP stack
 - Developed automation scripts using Bash & Python to handle user access, user creation and user authentication to servers conducting physical experiments.

Center Of Interest & Hobbies

- **Competitive Capture The Flag (CTF) player** **2020-Present**
 - Rigorous practitioner of pentesting vulnerable labs like TryHackMe and Hack The Box.
 - Live CTF competitions player: Actively participating in CTF competitions and CTF platforms like picoCTF and pwn.college
- **Bug Bounty Hunting** **2023-2025**
Pursued vulnerability disclosure programs on HackerOne and YesWeHack. Disclosed 2 bugs in web application Oauth solutions and web to C compiler intergrations.
